-
- The storage offered has an 18mm solid back. This is better than leaving the wall on show as it gives a barrier between a cold wall and your clothes which is particularly important on older properties and north facing external walls. You may want to fit a panel on the back wall above the top shelf using a tall end panel to hide the wall completely but this will cost a little more.
 - Each robe has a base, back, shelves where applicable and sides all made from superior 18mm chipboard with a 2mm abs edging tape which is the very best quality available. You don't see any floor or wall when you look inside just perfect robes by adding a panel on the back and side walls above the top shelf. Please note the top shelf is sold separately from the units at a cost of £110 Price group 1 and £132 group 2 and comes at 2600mm long.
 - Bespoke widths can be arranged for just £30 more except those with drawers or we can increase the height of the sides and back panel to a height to suit you for just an additional £30 up to 2500mm tall. You do then lose the full length continuous top shelf if you ask us to do it this way and you still need a panel to form the roof of the unit and maybe an extra panel to use as an additional shelf so as to make good use of the ceiling height and space above the rails.
